ABOUT ME

Software Engineer with 3 years of experience in PHP and Laravel web application development, specializing in backend systems, RESTful APIs, and scalable full-stack solutions. Proven track record in delivering B2B platforms, custom CMS, and LMS applications, with strong hands-on expertise in MySQL, JavaScript, Livewire, and React. Adept at working with Linux servers and managing VPS-based deployments to ensure robust, high-performance applications.

WORK EXPERIENCE

PHP Laravel FullStack Developer | Automaxion LLC (Ashtex Solutions) | Lahore | Mar 2025 - Jan 2026

- Developed and maintained end-to-end web applications using PHP, Laravel, Blade, JavaScript/jQuery, HTML, and CSS
- Implemented and consumed RESTful APIs to support application features and third-party service integrations
- Designed and optimized MySQL database schemas, queries, and relationships to support application logic
- Deployed and configured Laravel applications on Ubuntu servers, ensuring stable and secure environments
- Used Git for version control, managing branches, code reviews, and collaborative development workflows
- Collaborated within Agile teams to plan, develop, and deliver features, participating in sprint activities and iterative improvements

PHP Laravel Web Developer | Interlooper | Remote | Nov 2024 - Mar 2025

- Developed backend features using PHP and Laravel, focusing on clean, maintainable code and adherence to framework best practices
- Built and styled responsive user interfaces with HTML, CSS, Bootstrap, and jQuery to enhance usability and layout consistency
- Implemented and integrated APIs within Laravel applications to enable data exchange with external services
- Collaborated on both backend and frontend development tasks to ensure seamless end-to-end functionality
- Managed server-related operations to support application deployment, configuration, and basic maintenance
- Utilized Git and GitHub for version control, code collaboration, and maintaining a structured development workflow

Software Developer | University of Gujrat (SDMC) IT services | Gujrat | Jan 2024 - Jun 2024

- Developed and maintained web applications using HTML, CSS, JavaScript, jQuery, Bootstrap, PHP, Laravel and CodeIgniter
- Built and updated cross-platform mobile applications with Dart and Flutter
- Implemented front-end interfaces and responsive layouts to enhance usability and consistency across devices
- Integrated back-end logic and web services in PHP frameworks to support core application features
- Refactored and optimized existing codebases in web and Flutter projects to improve maintainability and reliability

IT Intern | AirSial | Sialkot | Sep 2021 - Oct 2021

- System administration, IT support, troubleshooting, hardware/software maintenance, server & database backups, desktop support.

PROJECTS

Herp Exchange

- Developed a secure logistics platform with FedEx and UPS certified integrations for safe overnight transport of live reptiles.
- Implemented real-time rate quoting, automated label generation, and integrated payment processing.
- Engineered end-to-end workflows ensuring reliability, efficiency, and user-friendly operations.

Technology : Laravel | PHP | MySQL | Bootstrap 5 | Laravel 11 | REST APIs | FedEx API | UPS API | Payment Integration

Momeni (B2B)

- Developed a B2B platform for wholesale distribution of rug rolls and custom-cut textiles to factories and business clients.
- Rebuilt a custom Headless CMS and Role-Based Access Control (RBAC) system to manage complex internal hierarchies and user permissions.
- Implemented dynamic content management and automated email workflows to streamline enterprise-level business operations.

Technologies: HTML | CSS | JavaScript | jQuery | Bootstrap 5 | Custom REST APIs | Laravel 7 | php 7.2 | MySQL

Mountain Dew

- Developed a custom geo-spatial marketing platform that gamifies the brand experience and engages users globally.
- Integrated Google Maps API with custom styling to allow users to pin 'adventure selfies' and track interactions.
- Implemented secure social authentication (Google) and a high-performance image library for user-generated content.

Technologies: HTML | CSS | JavaScript | Bootstrap 5 | Laravel 12 | MySQL | Google Maps API | Social Authentication

SKILLS

- HTML5/CSS3 & JavaScript
- Bootstrap/jquery/React/livewire
- PHP 7/8
- Laravel (v7-12) Development
- RESTful API Integration & Development
- SQL, Redis & Database Management
- Version Control (Git, GitHub & Bit bucket)
- Linux, Nginx, MySQL, PHP, Apache
- CI/CD, Docker, AWS
- Website Maintenance & Support
- Python (AI, Automation, n8n, Zapier, Make)

EDUCATION

BS Software Engineering, University of Gujrat, Gujrat | 2023

- Bachelor in Software Engineering – specialized in software development (4 years)

DAE Electronics, Govt Collage Of Tecnology, Sialkot | 2019

- Diploma of Associate Engineering Electronics (3 years)

LANGUAGES

- Urdu (Superior/Native)
- English (Advanced High)
- Punjabi (Advanced Mid)
- German (Novice)
